VRD Aquisitions, LLC helps you save today and tomorrow with ENERGY STAR® qualified homes.

OUR HOMES PROVIDE:

THE GOVERNMENT BACKED ENERGY STAR LABEL

Home buying is complex enough without having to know all the details of energy-efficient construction. Instead, look for the ENERGY STAR label to easily identify homes that are truly energy efficient.

LOWER UTILITY BILLS

Our ENERGY STAR qualified homes use substantially less energy—delivering \$200 to \$400 in annual savings. Over the average 7 to 8 years you may live in your home, this adds up to thousands of dollars saved on utility bills.

COMFORT AND QUIET

Properly installed energy efficiency features deliver better protection against cold, heat, drafts, moisture, pollution, and noise. Our ENERGY STAR qualified homes help to provide consistent temperatures, improved indoor air quality, and greater durability.

ENVIRONMENTAL PROTECTION

Buying an ENERGY STAR qualified home is a decision you can be proud of. Energy used in our homes often comes from the burning of fossil fuels at power plants, which contributes to smog, acid rain, and global warming. By using less energy, your new ENERGY STAR qualified home helps to reduce the amount of air pollution generated.

LOWER MAINTENANCE

Enjoy the peace of mind that comes with a low-maintenance home. Tight construction and long-lasting, efficient equipment make our homes more durable, helping to minimize many of the maintenance problems found in typical homes.

To earn the government's ENERGY STAR, a home must meet strict energy efficiency guidelines set by the U.S. EPA. ENERGY STAR qualified homes are quieter and more comfortable, have lower utility bills, and help protect the environment by reducing greenhouse gas emissions.
